I went through this process

- I found the E-TEN glofiish devices
- They are very similar to Openmoko
  - Samsung S3C2442 SoC MCP with NAND+SDRAM
  - TD028TTEC1 full-VGA LCM
- Other hardware parts reasonably supported/known
  - Marvell 8686/libertas WiFi (SPI attached)
  - SiRF GPS (UART attached)
  - CSR Bluetooth (UART attached)
- Only some unknown parts
  - CPLD for power management and kbd matrix
  - Ericsson GSM Modem (AT commandset documented!)
  - Cameras (I don't really care)
